ZANARI ANALYTICS

Company Profile

Transforming Data into Actionable Insights

OUR VISION

To become a global leading provider of Business Intelligence and AI-driven digital transformation solutions that empower organizations to thrive in the digital era.

OUR MISSION

To deliver secure, scalable, and innovative analytics, cloud, and AI solutions that enable data-driven excellence.

OUR CORE VALUES

Innovation
We continuously explore emerging technologies and develop solutions that solve real-world business challenges.

Integrity
We conduct our business with honesty, transparency, accountability, and professionalism in every engagement

Customer Success
We partner with clients to deliver solutions that create measurable business impact.

Quality & Reliability
We build secure, scalable, and maintainable solutions using industry best practices.

Collaboration
We believe the best solutions come from teamwork, knowledge sharing, and strong partnerships with our clients and stakeholders.

Continuous Improvement
We support organisations in evolving their technology capabilities and digital maturity.

COMPANY OVERVIEW

Zanari Analytics Ltd is a Business Intelligence, Data Analytics, Artificial Intelligence, and Digital Transformation company helping organisations unlock the full potential of their data.

We design and implement modern data solutions that enable organisations to make faster, smarter, and more informed decisions through analytics, automation, and intelligent technologies.

Our expertise combines Business Intelligence, Data Engineering, Artificial Intelligence, Cloud Technologies, Enterprise Reporting, and Bespoke Software Development to deliver scalable technology solutions aligned with business objectives.

We work with organisations to transform complex data into meaningful insights that improve operational efficiency, enhance decision-making, and create sustainable business value.

BUSINESS CHALLENGES

Today's organisations operate in an increasingly digital and data-driven environment. Many businesses face challenges that limit productivity, reduce efficiency, and slow decision-making.

- **Manual & Inefficient Processes**
  Repetitive tasks consuming valuable time and resources
- **Disconnected Systems & Data Silos**
  Fragmented data preventing a unified business view
- **Limited Real-Time Information**
  Inability to access timely data for critical decisions
- **Poor Data Quality & Reporting**
  Unreliable data undermining confidence in insights
- **Rising Operational Costs**
  Increasing resource constraints squeezing margins
- **Cybersecurity & Data Concerns**
  Growing threats to data integrity and compliance
- **Slow Digital Adoption**
  Lagging behind competitors in technology utilisation
- **Difficulty Scaling Operations**
  Infrastructure unable to support business growth

These challenges can lead to delayed decision-making, reduced productivity, lower customer satisfaction, and missed opportunities for innovation and growth.

OUR SERVICE PORTFOLIO

Business Intelligence Solutions	Design and implementation of analytics platforms and dashboards
Data Analytics	Business insights, reporting automation, and performance analytics
Data Engineering	Data pipelines, warehouses, and integration solutions
AI & Machine Learning	Intelligent systems and predictive analytics
Software Development	Custom enterprise applications and digital platforms:ERP,Web and mobile apps, AI-Integrated Website development
Training and Managed Analytics Services	Training, adoption with Continuous support, optimization, and enhancement of analytics solutions

BUSINESS INTELLIGENCE & ANALYTICS

We help organisations transform raw data into actionable Insights and trends through modern analytics platforms.

Our capabilities include:

- Microsoft Power BI implementation
- Executive dashboards like Financial performance, Sales and Customer reports
- Operational reporting
- KPI monitoring
- Self-service analytics
- Automated reporting solutions
- Data visualisation and storytelling

DATA ENGINEERING

We design reliable data foundations that support enterprise analytics by centralizing their scattered data into a clean and central place for use.

Our capabilities include:

- Data warehouse development
- ETL/ELT pipeline development
- Data integration
- Database design
- Data modelling
- Cloud data platforms
- Data quality management

ARTIFICIAL INTELLIGENCE & ML

We develop intelligent solutions that help organisations predict, automate, and optimize business processes.

Our capabilities include:

- Predictive analytics
- Forecasting models
- AI-powered business insights
- Recommendation systems
- Intelligent automation
- Machine learning solutions

CUSTOM SOFTWARE DEVELOPMENT

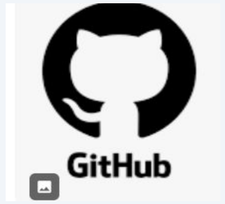

We build custom applications that improve business processes and operational efficiency.

Our capabilities include:

- Enterprise applications
- Business process automation
- Web applications
- Digital platforms
- System integrations
- Custom software solutions

DIGITAL TRANSFORMATION CONSULTING

We help organisations modernise their operations through technology adoption and data-driven strategies.

Our consulting services include:

- Digital transformation strategy
- Technology assessment
- Business process improvement
- Analytics maturity assessment
- Data governance advisory
- Training

TRAINING & MANAGED SERVICES

We help organisations modernise their operations through technology adoption and data-driven strategies.

Our Training & Managed Services Include:

- User training and capacity building
- System maintenance and technical support
- Software updates and performance optimisation
- Helpdesk and Service Level Agreement (SLA) support
- Documentation and knowledge transfer
- Ongoing consultation and technology advisory

WHY ORGANISATIONS CHOOSE ZANARI ANALYTICS

- ✔ Business-focused technology solutions
- ✔ Experienced Business Intelligence consultants
- ✔ Strong data engineering capabilities
- ✔ Microsoft Power Platform expertise
- ✔ AI and automation capabilities
- ✔ Secure and scalable architecture
- ✔ End-to-end implementation support
- ✔ Long-term technology partnership approach

TECHNOLOGY CAPABILITIES

Business Intelligence

- Microsoft Power BI
- Microsoft Fabric
- Apache Superset/Custom BI
- Tableau

Data Platforms

- Microsoft Azure
- SQL Server
- PostgreSQL
- MySQL
- Data Warehouses
- Data Lakes

Data Engineering

- ETL pipelines
- Data integration frameworks
- Apache Spark
- Apache Kafka

Development

- Python
- Web technologies
- API integrations
- Cloud-based applications

Artificial Intelligence

- Machine Learning
- Generative AI
- Predictive Analytics
- Intelligent Automation

OUR APPROACH

At Zanari Analytics, we follow a structured approach to ensure successful technology implementation.

1

Discovery & Assessment

Understanding business objectives, challenges, existing systems, and data environment.

2

Solution Design

Developing the appropriate architecture, technology approach, and implementation roadmap.

3

Development & Implementation

Building scalable solutions aligned with business requirements.

4

Testing & Deployment

Ensuring quality, security, performance, and successful adoption.

5

Training & Support

Providing user training, documentation, and ongoing technical support.

OUR IMPACT

Through our solutions, organisations are able to:

- ✓ Reduce manual reporting effort
- ✓ Improve operational visibility
- ✓ Make faster decisions
- ✓ Increase efficiency
- ✓ Optimise business processes
- ✓ Improve customer experiences
- ✓ Build a data-driven culture

INDUSTRIES WE SUPPORT

Our solutions are applicable across multiple industries including:

- Financial Services
- Education
- Healthcare
- Retail
- Transport & Logistics
- Rental & Fleet Management
- Professional Services
- Government and Public Sector
